

Bosch: Solutions for building and construction industry

BOSCH

Structure of the Bosch Group

Bosch Group
Sales: 38.2 billion Euros¹⁾
Associates on Jan. 1, 2010:
270,687

Automotive Technology

Sales: 21.7 billion Euros
Share of total sales: 57%

Industrial Technology

Sales: 5.1 billion Euros
Share of total sales: 13%

Consumer Goods & Building Technology

Sales: 11.3 billion Euros
Share of total sales: 30%

¹⁾ Including other business areas

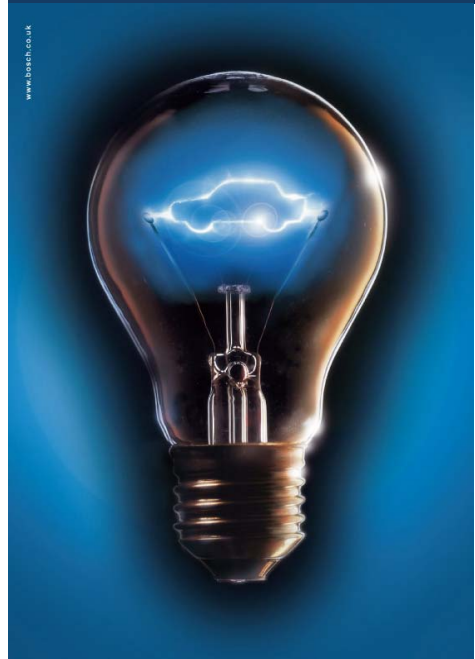

BOSCH

Technology leadership with a global presence

- Bosch group companies are present in over 60 countries worldwide.
- Including sales and service partners, Bosch is represented in over 150 countries.

- Bosch spends about 9% of its sales revenue every year on research and development.
- In 2009, Bosch first-filed 3,872 inventions, and ranks No. 3 for patent applications, as per World Intellectual Property Organization.
- Special ownership structure of the company guarantees strong long term financial stability.

A steady flow of bright ideas—
15 new patents
every working day

BOSCH

Bosch solutions for building industry

Bosch provides a wide range of innovative, technologically advanced systems and solutions for residential, commercial, or industrial projects in the field of:

- Heating, ventilation, air conditioning and hot-water systems
- Solar Energy
- Security and Communications Systems
- Household Appliances
- Drive and Control Technology
- Power Tools and Accessories

Saving energy – a Bosch strength

Solar thermal systems for heating and hot-water

Photovoltaic as renewable energy source

Innovative power tools with lithium-ion technology

Energy-efficient household appliances

BOSCH

Thermotechnology

Hot-water systems

Water heating systems from Bosch offer energy efficient and customised heating solutions for individual requirements.

With excellent energy efficiency, Bosch water heaters provide considerable savings in running costs.

BOSCH

Thermotechnology

Renewable energy heating systems

High performance condensing boiler technology, solar thermal appliances, and energy management controls.

Technical support for the entire project planning, installation and final commissioning.

BOSCH

Solar Energy

Solar cells, crystalline modules and thin film products

From solar cells and modules to complete solar power plants, Bosch Solar Energy develops, produces and markets high-grade photovoltaic products to generate electricity from sunlight.

The renewable and sustainable energy source for the future.

BOSCH

Solar Energy

Solar power plants

On behalf of private and institutional investors, Bosch Solar Energy develops sites all over the world which have the potential to house solar power installations.

Complete solutions from planning, technical design, solar modules, mounting systems to installation of solar park.

BOSCH

Security Systems

Security and safety

Security Systems provides state of the art video surveillance, access control, and intelligent intrusion and fire detection systems for your complete security and safety.

Advanced sensor technologies and automation systems for your total security.

BOSCH

Security Systems

Public address and conference communication systems

Complete solutions for public address, voice evacuation, conference and congress communication systems.

Comprehensive range of professional audio products for all your communication needs.

BOSCH

Household Appliances

Cooking appliances, white goods, and consumer products

The product portfolio of Bosch Household appliances division covers the entire range of modern household appliances.

Energy efficient products designed keeping customer convenience in mind.

Drive and Control Technology

Components, Systems and Consulting

Bosch Rexroth offers custom tailored solutions for driving, controlling and moving in Industrial automation, mobile applications and renewable energies including energy efficiency consulting on plant level.

Technologies and expertise for improving energy efficiency over the complete life-cycle of buildings.

BOSCH

Power Tools

Hand-held and bench top power tools

From cordless lithium-ion tools to a range of corded versions, hand-held tools are available for a variety of applications in drilling, demolition, grinding, metal working etc...

An extensive range of bench top tools for sawing, plastic, wood working etc...

Powerful, hard wearing, compact, and easy-to-handle, low vibration products from Bosch offers best-in-class productivity.

BOSCH

Power Tools

Measuring tools and Accessories

Intelligent measuring devices for levelling, laser range finding or detection.

Universal and product specific accessories including saw blades, drill bits, screw driver bits, abrasive discs and others for all applications.

With precision, speed and convenience, Bosch power tools are truly for professionals, from professionals.

BOSCH

Bosch: The ideal partner for construction and building industry

As a leading global supplier of industrial and building technology, Bosch is a strong partner with acknowledged technical expertise for construction industry professionals, engineers, developers worldwide.
